

## Specifications

### Description

Adcraft's chamber vacuum packaging machine is ideal for all of your preserving, marinading, pickling and seasoning needs. This powerful tabletop chamber vacuum packaging machine works well with liquids and liquid-rich foods. It sucks the air out of the entire chamber when sealing, not just the bag itself. This means the air pressure is equalized both inside and outside of the bag, keeping liquids in and ensuring a superior seal every time. Constructed with a stainless steel body, this unit has a digital front control display that makes it easy to use. The smoky-clear lid lets you see and monitor the vacuum process. A powerful 1/2 hp oil pump provides up to 29.5" Hg of suction. The 11" wide sealing bar provides maximum results and long lasting usage. It also comes with filler plates to use when sealing smaller batches. 110V, 370W, 3 amps and a detachable 9' long power cord with a NEMA 5-15 plug. This unit is CE Certified and backed by Adcraft's 1 year replace or repair warranty.

### Construction

- Body is constructed of polished stainless steel
- Interior chamber has a stainless steel liner
- Smoky-clear lid with lock that opens up 45°
- Easy to use front control panel with digital display
- Separate on/off power switch on the side of the unit
